# WHY

**National Fall Prevention Stand-Down**  
...called for a National Fall Prevention Stand-Down...  
...2<sup>nd</sup> through June 6<sup>th</sup>. During the stand-down...  
...and their supervisors are asked to pause during the...  
...day and talk about fall hazards and fall prevention. The...  
...to reduce the number of falls in construction.  
...Unfortunately, falls account for the largest number of deaths...  
...in the industry. Those fatalities are completely...  
...training. If we...  
**Another mistake is taking chances.** Nobody comes to work expecting to fall, but that's not the same as working to avoid a fall. When you work at an unprotected edge, stand on the rail of a scaffold, or lean a little too far on a ladder, you're taking chances. Each time you take chances like this, your mind registers that you did it and "got away with it." You teach yourself that these chances are "OK" and it gets easier for you to take them. Break the pattern. Identify fall hazards and then take action to avoid getting hurt. If you work 6 feet or more from a fall, you have to be protected from falling.

## You need Weekly Safety Meetings.

### Why Safety?

You know what OSHA can do when they find violations on your site. You understand that accidents raise your workers' compensation premiums. You really don't want anybody to get killed on your jobsite. But what are you **DOING** to avoid those problems? Weekly Safety Meetings can help.

### Why Meetings?

Remind your employees to follow safe work practices. Help them identify unsafe conditions. Keep them thinking about safety and making safe choices. Weekly Safety Meetings help protect your most valuable assets.

### Why Weekly?

Shorter, more frequent tool box talks mean better comprehension and retention. Training once a week with Weekly Safety Meetings takes ten minutes or less and you cover four or five important topics every month.

# HOW

**NEW!**
